CONSTRUCTION INPUT PRICE INDICES

THIRD QUARTER 2025 RELEASE

SEPTEMBER 2025

CONSTRUCTION INPUT PRICE INDICES FOR THE THIRD QUARTER 2025

The Kenya National Bureau of Statistics hereby releases Construction Input Price Indices (CIPI) for the third quarter of 2025. CIPI measures the price changes in the inputs that are consumed/used in the construction process. The main inputs into construction projects are classified into materials, labour, equipment and transport. The indices are generated from price data collected quarterly from a representative sample of outlets that trade in construction materials.

The CIPI and inflation rates are as shown in Tables 1 and 2. In the third quarter of 2025, the Construction Input Price Indices increased to 121.27, up from 119.75 in the second quarter, translating to a quarter-on-quarter growth of 1.27 per cent. The year-on-year inflation was 0.74 per cent, indicating that input prices were slightly higher in Q3 of 2025 compared to Q3 of 2024. Materials indices that had notable increases included steel and reinforced bars (5.20%) sand (3.63%), ballast/gravel (1.41%), dense bitumen macadam (4.73%), and fuel and lubricants (3.53%), paints (1.47%), sanitary fittings (0.98%), and electrical fittings (5.09%). However, these increases were partly offset by declines in the indices of cement (-1.39%), timber and wood (-2.71%). The equipment indices increased by 0.64 per cent to 106.98 while labour indices rose from 111.94 in Q2 of 2025 to 112.45 in Q3 of 2025.

The Building Cost Index rose from 119.52 in the second quarter of 2025 to 121.29 in the third quarter of 2025. The increase was mainly driven by the rise in indices of steel and reinforced bars (5.05%), sand (3.63%), ballast (2.25%) and roofing materials (2.49%) among others. Materials indices

that recorded declines were cement/lime (-1.39%), timber (-2.75%), tiles (-2.65%), chip boards (-3.10%) and water wastes (-0.81%). The building equipment indices rose from 101.27 in second quarter of 2025 to 102.20 in third quarter of 2025. The transport and fuel indices rose by 3.73 per cent to 133.61 over the same review period. This was largely driven by increase in the indices of both transport (3.38%) and fuel (4.25%). The building labour indices increased from 115.62 in Q2 of 2025 to 116.31 in Q3 in 2025, reflecting an increase of 0.59 per cent. The notable increases were in indices of casual laborers (1.07%) and watchmen (3.90%), while plumbers/electricians (-1.49%) and machine operators (-0.68%) slightly declined.

The civil engineering cost index increased from 120.52 in the second quarter of 2025 to 121.79 in the third quarter of 2025. This growth was largely driven by increase in the indices of paving grade bitumen (3.05%), tack coat (4.06%), and dense bitumen macadam (4.73%), alongside increase in indices of fuel and lubricant (4.63%) and equipment (0.41%). Labour indices remained broadly stable, with only marginal movements across occupations. The civil engineering cost labour index remained broadly stable, with only marginal movements across occupations edging up slightly by 0.3 per cent, from 108.48 in Q2 of 2025 to 108.83 in Q3 of 2025.
